

LibreOffice Impress Presentation

Develop an presentation application using appropriate LibreOffice package.

Here is a **step-by-step** guide to develop a presentation application using LibreOffice (Impress) for your **Free and Open Source Software Tools** subject.

Develop a Presentation Application using LibreOffice Impress

1. Introduction to LibreOffice Impress

LibreOffice Impress is a free and open-source presentation software used to create slideshows, similar to Microsoft PowerPoint. It is part of the LibreOffice suite.

It is used to create:

- Educational presentations
 - Business presentations
 - Project presentations
 - Reports with multimedia
-

2. Steps to Create a Presentation

Step 1: Open LibreOffice Impress

- Click **Start Menu** → **LibreOffice** → **LibreOffice Impress**
 - Select **Blank Presentation**
 - Click **Create**
-

Step 2: Choose Slide Layout

- Go to **Slide** → **Layout**
- Choose layout such as:
 - **Title Slide**

- Title and Content
 - Two Content
 - Title Only
 - Blank Slide
-

Step 3: Enter Content

You can insert:

- Text
- Images
- Tables
- Charts
- Audio
- Video

Go to:

- **Insert → Image**
 - **Insert → Table**
 - **Insert → Chart**
 - **Insert → Audio/Video**
-

Step 4: Apply Design / Theme

- Go to **Slide → Master Slide**
 - Choose a theme/background
 - Change font style, color, and size
-

Step 5: Add Animations

- Select object
 - Go to **Slide Show → Custom Animation**
 - Choose animation like:
 - Appear
 - Fade
 - Fly In
 - Zoom
-

Step 6: Add Slide Transition

- Go to **Slide Show** → **Slide Transition**
 - Choose transition like:
 - Fade
 - Push
 - Wipe
 - Split
-

Step 7: Save Presentation

- File → Save As → Save as .odp format
-

Step 8: Run Slide Show

- Press **F5** to start presentation
 - Press **Esc** to exit
-

3. Example Presentation Structure (Sample)

Topic: Free and Open Source Software

Slide	Content
Slide 1	Title – Free and Open Source Software
Slide 2	Introduction
Slide 3	Features of FOSS
Slide 4	Advantages
Slide 5	Examples (Linux, LibreOffice, Samba)
Slide 6	Conclusion

4. Features of LibreOffice Impress

- Open source and free
 - Supports images, audio, video
 - Animation and slide transition
 - Templates and themes
 - Export as PDF
 - Supports PPT, PPTX formats
-

5. Advantages

- Free to use
 - No license required
 - Works on Windows, Linux, Mac
 - Supports multiple file formats
 - Easy to use
-

6. Conclusion

LibreOffice Impress is a powerful open-source presentation tool used to create professional presentations with multimedia, animations, and templates. It is widely used in education, business, and organizations because it is free and supports many features similar to PowerPoint.

If you want, I can also give **what to write on each slide (slide content)** for your presentation.

Compare and contrast LibreOffice and Microsoft Office.

Here is a **clear and detailed comparison of LibreOffice and Microsoft Office** for your exam or assignment:

Comparison between LibreOffice and Microsoft Office

1. Introduction

- LibreOffice is a free and open-source office suite developed by The Document Foundation.
 - Microsoft Office is a commercial (paid) office suite developed by Microsoft.
-

2. Key Differences

Feature	LibreOffice	Microsoft Office
License	Free and Open Source	Proprietary (Paid)
Cost	Completely free	Paid (subscription or one-time purchase)
Developer	The Document Foundation	Microsoft
Platforms	Windows, Linux, macOS	Windows, macOS, Web, Mobile
File Format	ODF (.odt, .ods, .odp)	Office formats (.docx, .xlsx, .pptx)
Internet Requirement	Not required	Often requires internet (especially Office 365)
User Interface	Traditional	Modern (Ribbon interface)
Cloud Integration	Limited	Strong (OneDrive, Teams)
Collaboration	Basic	Advanced real-time collaboration
Updates	Community-driven	Regular official updates

3. Application Comparison

LibreOffice	Microsoft Office	Purpose
LibreOffice Writer	Microsoft Word	Document creation
LibreOffice Calc	Microsoft Excel	Data analysis
LibreOffice Impress	Microsoft PowerPoint	Presentations
LibreOffice Base	Microsoft Access	Database

4. Advantages of LibreOffice

- Free and open source
- No license cost
- Works offline
- Supports many file formats
- Customizable

5. Advantages of Microsoft Office

- User-friendly interface
- Better compatibility with industry formats
- Advanced features (Excel formulas, PowerPoint design)
- Strong cloud integration (OneDrive)
- Real-time collaboration

6. Limitations

LibreOffice

- Limited collaboration features
- UI is less modern
- Compatibility issues with complex MS Office files

Microsoft Office

- Expensive

- Requires subscription for full features
 - Internet dependency for cloud features
-

7. Similarities

- Both provide:
 - Word processing
 - Spreadsheet tools
 - Presentation software
 - File saving and exporting
 - Templates and formatting tools
-

8. Conclusion

- **LibreOffice** is best for students, individuals, and organizations looking for a **free and open-source solution**.
 - **Microsoft Office** is ideal for businesses and professionals needing **advanced features and collaboration tools**.
-

If you want, I can convert this into a **perfect 10-mark exam answer** or a **presentation (slides format)**.
